

CMPE 483 Sp. Top. in CMPE Blockchain Programming
Spring 2018

Homework 2 (due May 12th)

(The project can be done in groups of at most three students)

Build a web based user interface for the Lottery Project you have developed in Homework 2. You should have a complete project that runs on the Brave Browser and the Ropsten Test Network. Anyone having a metamask account should be able to use the interface to interact with your Lottery smart contract.
